

# Urban Archaeologists 1 – Layers of the Upper West Side

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Below is a blank map of the Upper West Side and Central Park. You can see the island's original coastline in light gray inside the neighborhood.

As we trace the city's history, fill in the features, roads, buildings, parks, and other parts of the map that arrive over time. Use a different color for each different time period of development!
